
Advanced Planning and Design for Cycling Christchurch – Monday 21 September 2009 Module 4 – Intersection Design

Advanced Planning and Design for Cycling

On behalf of the NZTA, ViaStrada has developed an Advanced Planning and Design for Cycling course, to expand on the Fundamentals of Planning and Design for Cycling. The new course is arranged in three specialised modules, which can be taught independently or as a 2 day block. Including the Fundamentals course, the modules are as follows:

○ Module 1	Full day	Fundamentals of Planning and Design
○ Module 2	Half day	Advanced Planning and Funding
○ Module 3	Half day	Midblock Design
○ Module 4	Full day	Intersection Design

While there are no prerequisites for attendance of the advanced modules, and each is aimed at a different target audience, delegates will find it beneficial to have completed the Fundamentals course (Module 1) or to have a similar level of understanding. Our website at www.viastrada.co.nz has more detailed information. Please do not hesitate to contact us to speak to one of the trainers for advice.

Course presenters will be Axel Wilke and Andrew Macbeth, Directors of ViaStrada Ltd. Axel and Andrew are well known in New Zealand for their expertise in sustainable transport and especially cycle planning and design.

Module 4 is being offered as a standalone course on Monday, 21 September 2009.

We have several different registration fee categories reflecting whether or not attendees are volunteers from approved community organisations. See the registration form on page 3 for fee details. For registration enquiries, please contact Helen Woodhouse (03-366-7605; helen@viastrada.co.nz).

Venue: Christchurch – Holiday Inn on Avon, 356 Oxford Terrace, Christchurch

Duration: 8.15 am to 4.30 pm

Advanced Planning and Design for Cycling – Module 4
